Chef for HENDI and cover hero of the assortment catalogue 2023: Carmine de Michele.

Carmine de Michele & HENDI – shared

HENDI is growing and relying on its usual strengths on its way to becoming Europe's leading gastronomy, hotel and catering equipment supplier ... and new approaches. Service, design, choice, availability, reliability, new ways of doing business and a familiar face – a master of his trade, pizza runner-up, entrepreneurial spirit and of course Chef for HENDI: Carmine de Michele.

When it comes to honest yet exclusive feel-good gastronomy, there is currently no getting around him in the Austrian restaurant scene, the chef and owner of „De Michele – verace Pizza napoletana“.

Carmine de Michele is anything but mainstream and stands for lots of bella vita. He is Italy in the heart of Austria ... and chef for HENDI. In other words, Italian

lifestyle and the most beautiful culinary sides of the Mediterranean country paired with regionality, gastronomic perfection and entrepreneurial innovation.

Born in 1990 in Naples in southern Italy, he and his passion for forbidden good pizza do his hometown great service as culinary ambassadors. Be it with the restaurant „De Michele“, which opened in 2018, „De Michele Ca-

values, lived practice.

tering”, pizza courses or a pizza ape for events.

This mixture of innovative spirit and the courage to take risks proved to be the right decision: De Michele has recently flourished, earning him the title of Austria’s best pizza chef and one of the best pizzaiolos in the world, among others, several times. And rightly so, because with a lot of charm and personality, he

and his team do exactly what they do best: Making guests happy ... and enjoying great dishes, prepared with love and high-quality ingredients in the atmosphere of an Italian enclave in the heart of Upper Austria, a very special experience.

This requires professionalism, reliability, authenticity and a strong sense of service: shared values and lived practice, in other

words, which make Carmine de Michele and HENDI an excellent combination and definitely anything but grey everyday life.

UNIQ

a new HENDI
design classic

Unique buffet presentations with the new chafing dish and soup kettle designed by Robert Bronwasser.

Up till now electric chafing dishes and soup kettles have been functional. But, as often with functional products, the design could hardly be described as beautiful and doesn't do justice to the delicious food served from them.

design by
Robert Bronwasser

For over three years HENDI and Robert Bronwasser have been working extensively on this new range. The effort is not only visible in the design but also in the functionality.

Notable features:

1. The lid guides condensation moisture back into the water container.
2. No more loose lids lying around thanks to the hinged glass lid which is mounted in the container cover.
3. The display keeps track of the total operation time, reducing the risk of having it out too long.
4. Chafing dish and soup kettle are available in 3 colours, black, off white and green.

Meet HENDI Profi, Kitchen and Budget Line

Each of them fulfills different requirements - it is profiled towards the specific needs of different levels of chefs and cooks.

PROFI LINE

The partner for professionals ideally suited for the most demanding kitchens. Well thought out and solid construction made of the highest quality materials and components. Ready for intensive everyday use. The guarantee of long operation and ease of maintenance translates into lower costs.

KITCHEN LINE

Reliable tools for professional kitchens. Made of standardized materials, high quality at a reasonable price. Intended for regular, balanced use, it guarantees reliable gastronomic results with an energy-saving focus.

BUDGET LINE

When money counts these are our most cost-efficient tools for daily use in professional kitchens. They're made from basic but good materials with a more basic finish. A well-thought-out design - facilitating simple and uncomplicated use.

All lines meet safety standards, come with standard warranty, and are covered by after-sales service.

Always up-to-date!

Our catalogue is also available online with nice features like:

- + powerful search tool
- + easy navigation
- + fast sharing.

But most important of all, **up-to-date prices**.

NEW
Powerful mixer with two speeds,
15,000 and 19,000 rpm

MILKSHAKER - DESIGN BY BRONWASSER
- Designed by Dutch Designer Robert Bronwasser, the milkshaker is stylish and functional, the appliance is available in 6 attractive colors.
- Ideal for preparing frothy cappuccino, frappé and milkshakes.
- Housing made of durable ABS plastic.
- Powerful motor with two speeds, 15,000 and 19,000 rpm.
- Convenient operation with a two-speed switch located on top of the unit.
- Milk frother equipped with a microswitch ensures that the appliance works only when the cap is in the right position.
- Rubber feet absorb vibration and protect the working from scratches.
- Supplied with a comprehensive set of accessories:
2 cups made of stainless steel capacity 0.95 l and of polycarbonate capacity 0.9 l.
2 sets of replaceable polycarbonate stirrers (2 pieces each).
- The stirrers will help you pull up the product.
- Both cups and stirrers are dishwasher safe.

	Color	Material	Capacity	Price

PAN SERIES PROFI LINE

- Thick sandwich bottom (stainless steel/aluminium/stainless steel) combines the heat spreading properties of aluminium with the durability and magnetic properties of stainless steel, making it suitable for use on induction stoves.
- The bottom is formed by high impact bonding, causing the whole surface of the layers to weld seamlessly.
- Solid handles, thanks to the clever way of mounting the heat from the pans isn't transferred into the handles.
- The pans are acid resistant and easy to clean.

FRYING PANS DIE-CAST ALUMINIUM ,TITANIUM PROFESSIONAL'

- Made of cast aluminium, suitable for all heat sources and even suitable for use in ovens (up to 250°C).
- Cast aluminium excels at conducting heat, the pan is quickly ready for use.
- The handle is made from 18/10 stainless steel and remains cool during use.
- The 'Teflon™ Platinum Plus' non-stick coating has a high temperature resistance (up to 250°C).
- The coating is applied in three layers which increases the wear resistance and makes the pan ideal for intensive use.
- Very easy to clean after use.

Primer coating: for anti-corrosion, anti-shock & better durability of coatings

Titanium coating:

for anti-scratch & anti-abrasion

Mid coating: Whitford® Xylan non-stick

Top coating: Reinforcement of non stick layer and brighten surface

Induction bottom

With strong stainless steel handle

GRIDDLE FOR INDUCTION COOKERS

- Suitable for use on induction stoves.
- Made of die cast aluminum with Teflon® non-stick coating.
- Suitable for heat-sources up to 250 °C.

code	mm	€
629130	390x260x(H)35	24,95

FRYING PANS DIE-CAST ALUMINIUM ,TITANIUM PROFESSIONAL'

- Made of cast aluminium, suitable for all heat sources except induction and even suitable for use in ovens (up to 250°C).
- Cast aluminium excels at conducting heat, the pan is quickly ready for use.
- The handle is made from 18/10 stainless steel and remains cool during use.
- The Whitford® Xylan non-stick coating has a high temperature resistance (up to 250°C).
- Adhesion of the non-stick coating is improved by a layer of titanium between the aluminium and the coating.
- This double-layer procedure improves the service life of the coating and provides additional scratch-resistance.
- Very easy to clean after use.

BEFORE FIRST USE

Step 1
Put cooking oil in the pan and heat it. Add potato peelings and a lot of salt, then let it fry a bit.

Step 2
Take a kitchen towel and carefully rub the mixture around the inside of the pan.

Step 3
After rubbing the pan thoroughly, empty the pan. Now there will be residue of the potato peelings left in the pan.

Step 4
To remove the residue put a lot of salt in the pan and rub the salt around the pan with a kitchen towel to remove the residue. Don't do this on the stove.

Step 5
Remove the dirty salt, wipe the pan clean and pour a thin layer of oil in the pan.

Step 6
Spread the oil in the pan with a clean kitchen towel. The pan is now ready for first use or storage.

NEW

CAST IRON CASSEROLE ENAMELLED

- Made from cast iron, with red enamel coating on the outside.
- Lid with bumps on the inside that force water droplets (steam) to fall back, keeping the dish moist and aromatic.
- Suitable for all heat sources including induction.
- Not dishwasher safe.
- Available in different sizes; the smallest can be used as a serving dish [code: 626856].

GN GASTRONORM SYSTEM

- Designation of standard size containers used in food industry, determined in PN-EN 631-1:1996 standard.
- Standardisation of container dimensions makes it easier to use them in various kitchen appliances which are designed
- based on these dimensions, e.g. in ovens, insulated containers, refrigerated cabinets, bain-maries, transport trolleys

height (mm)

DIMENSIONS OF GN CONTAINERS:

GASTRONORM CONTAINERS PROFI LINE

- Made of high grade stainless steel 18/10.
- Very solid design.
- Smooth edges, easy to clean.
- Can be used in convection ovens, refrigerators, bain-marie systems and chafing dishes.

Very strong and durable.

For use at temperatures
-40°C / 300°C.

Excellent resistance to corrosion.

Reduced inner radius increases
maximum capacity.

KNIVES PROFI LINE

- All knives are precision hot drop forged from a single blank of high carbon German stainless steel.
- The specialized Chromium-Molybdenum-Vanadium surgical alloy steel X50CrMoV15 guarantees the following characteristics: - razor sharp - long-lasting cutting edge - easily restorable edge - high stain resistance. Some 50 major manufacturing steps are required to produce each knife.
- Traditional skills and precision machinery continue the grinding and polishing operations until the final cutting edge is applied at the most appropriate blade angle.
- The handle combines balance, safety, heft and control with an exclusive look.
- Each knife is individually packed in a PET presentation blister.

HENDI SAMURAI JAPANESE MANDOLINE

- Sturdy construction: elements made of stainless steel, ABS and polypropylene.
- Flat steel surface is divided into 2 parts which can be opened for easy access to blades, in order to adjust, remove or clean them. The surface has non-stick PTFE coating which facilitates very smooth cutting (vegetables/fruits slide smoothly).
- Ultra-sharp blades in a few variants offering various – but always perfectly precise and consistent – cutting effects:
 - 2 flat blades located on a reversed piece: smooth or serrated blade,
 - removable and rotatable roller with serrated blades; cutting thickness and type are easily adjustable with a knob: from 0 mm to 9 mm, slices or julienne.

MEAT TENDERIZERS

MEAT TENDERIZING HAMMER

- Firm grip.
- Spiked surface for pork and beef.
- Plain surface for fish and poultry.

code	mm	€
513002	(L)260	9,75

MEAT TENDERIZER PROFI LINE

- Modern and effective tool for meat improvement, the interspaced vertical blades reduce the length of meat fibers.
- Perfectly tenderizes meat by softening the tissue and flattening meat at the same time.
- Marinating time can be reduced by up to 25%, because the surface area of the meat is significantly increased.
- During frying, the subtle perforation will allow sauces poured over the meat to penetrate.
- Soft springs, easier use, better result.

- The housing is made from ABS plastic.
- The base is weighted for extra stability and is fitted with rubber feet.
- The motor can spin the agitator disc at two speeds, 15.000 and 19.000 RPM.
- Control the milkshake mixer with the two-speed switch on the top which is easily accessible.
- The milkshake mixer is fitted with a micro switch so it can only operate when the cup is properly placed.
- Choose between two different agitators to control the level of aeration.
- Included in the set: stainless steel mixing cup (0.95 liter), tritan mixing cup (0.9 liter) and a set of 2 tritan stirrers.
- Cup and agitators are dishwasher safe.

design by
Robert Bronwasser

TEMPERATURE STABILISER

From the first second of operation, the burner reaches the optimum flame temperature of 1300 °C. BLUE HEAT REPEATABLE

GILL-TYPE AIR INTAKE

The air inlets on the burner increase the air intake capacity. HIGH FLAME POWER, SOOT FREE COMBUSTION

PRECISE FLAME CONTROL

Ideal for browning sugars, proteins, cheeses, fruit, vegetables and meat. FLAME LENGTH ADJUSTABLE UP TO 150 MM

LONG 100 MM NOZZLE

- safe flambéing
 - precise placement of the fire zone
 - maximum separation of the hand from the high temperature
- COMFORT and FREEDOM

QUICK INSTALLATION

Quickly install the cannister thanks to the clear markings on the SAFETY COVER. One click and the cannister is SAFELY replaced. YOU CAN BE SURE THAT THE CANNISTER HAS BEEN INSTALLED CORRECTLY

HENDI JET CHEFS' TORCH

- Designed with chefs in mind by Robert Bronwasser.
- This torch is a pleasure to use thanks to the stylish matt black design with green accents and the ergonomic grip.
- The torch is easily and securely attached to the gas cartridge (it's possible to replace it after gas runs out) and covers the whole top of the cartridge.
- The piezo ignition makes it easy to ignite, the large gas dial allows for easy adjusting the flame size and intensity.
- This chefs torch can operate at every angle, even upside down, thanks to the improved design of the burner that prevents flaring.
- Precise flame control, flame length up to 150 mm.
- Cartridges can be purchased separately, code: 199039.

code	-	mm	€
198247	HENDI Jet chefs' torch	185x65x(H)100	19,95

198247

199039

VERTICAL WORK – Gen 2.0

- flame burns without flickering under every angle, even upside down / 360 degrees.
- the flame does not retract towards the burner and the hand

VERSATILE AND SAFE

DESIGNED TO BE EASY TO SPOT

Contrasting colours allow you to immediately locate the device among your kitchen utensils.

GAS COVER

Made of a cover plate and a single pass-through valve, it prevents interference from flashback flames. SAFETY

RELIABLE

Pressing the ignition button generates an electrical voltage that ignites the gas.
PULL THE TRIGGER AND IT WORKS
– NO REPLACEMENT OF FLINTS NECESSARY

DESIGNED TO MEET CULINARY NEEDS

Thanks to the construction and materials, the burner is very strong and yet lightweight.
GO FOR QUALITY – USE A TOOL THAT WILL LAST FOR YEARS

199039

LPG GAS CARTRIDGE

- Suitable for use in combination with HENDI Chefs torches 198247 & 198216.
- Not suitable for refilling gas lighters etc.
- Packed per 4 canisters.

PROFI LINE SLICER

- Housing made of coated aluminum, with non-slip feet.
- Hardened stainless steel blade, angled.
- Air-cooled motor with overheating protection.
- Powerful motor for slicing tough meats.
- Equipped with blade guard and built-in sharpener.
- Trolley with safety guard, clamping element and vertical locking device.
- Quick and easy disassembly for effortless cleaning.
- Meets all safety requirements for equipment for professional use, i.e.:

- setting the knob to "0" slicing thickness keeps the blade behind the guard.
- protection against unwanted start-up if the sharpener or the blade guard is removed.
- possibility to lock and remove the trolley only with the blade set in "0" slicing thickness position.
- Not suitable for slicing cheese.
- Cheese slicing possible with a separately available non-stick knife.

POTATO PEELERS KITCHEN LINE

- Intended for professional use, ideal for industrial kitchens, institutional kitchens or any kitchen that must peel fast amounts of potatoes and other root vegetables a day.
- Peels the potatoes by means of an abrasive disc and abrasive pads on the inside of the drum.
- Drum, disc and abrasive pads made of high-quality stainless steel, resulting in a very durable, efficient and easy to clean machine.
- Abrasive disc is fitted with aluminum alloy agitators.
- The lid is made of durable polycarbonate; lets you keep an eye on the peeling process.
- Thanks to the powerful engine peeling a single load only takes 2 to 3 minutes.
- Control panel fitted with an 8-minute timer and control lights.
- Very safe to operate, a micro switch stops the peeler when the cover is opened.
- Fitted with a freshwater and drain connection, for rinsing potatoes during peeling.
- With an effective peel collection trap, consists of 2 containers of which one is perforated, prevents the clogging of the sewage system.
- Legs are fitted with plastic feet for stability, two legs have mounting plates for secure mounting to the floor.
- Water resistance class: IP23.

V-SHAPE BELT MODULE
Ready for extreme, long-lasting operation

HOUSING
Robust, made of die cast aluminium

SOFT START
11-degree speed smoothly regulated with a knob, adjusted to the chosen program

BOWL - 7 LITRES
Made of AISI 304 stainless steel. Fitted with a convenient handle with anti-slip coating

GEARS
Very strong - made of stainless steel, responsible for uniform planetary rotation. Smooth transition to the demanded power level

CONTROL PANEL
- Designer, easy to read
- Counting time required for cake baking

4 automatic programs:
- Slow mixing (speed 1-6)
- Standard mixing (speed 1-8)
- Gentle mixing (speed 1-9)
- Fast mixing (speed 1-11)

LID WITH A DISPENSER
Convenient adding ingredients during operation without worrying about getting the worktop unclean

Hook for heavy doughs
AISI 304 stainless steel

egg whisk
AISI 304 stainless steel

Mixer 1
synthetic material POM

Mixer 2
AISI 304 stainless steel

Bowl 7 L
AISI 304 stainless steel

Be Safe Protection

- Overheating protection
- Retractable cutter
- Non-conductive hold-down arm
- Non-slip table stabilisers
- Swing guides with stops
- Overload fuse
- Illuminated switch
- Visible HOT marking

Auto Lift

A system of stays for easier lifting of the heating plate. Increases efficiency.

Robust Design

The frame is made of acid-resistant steel with a thickness of over 2 mm. Solid and robust design.

Non-Stick Titanium Sealing Surface

Prevents all types of film from sticking to the surface. Quick sealing, takes 1-3 seconds (depending on film thickness).

Pressure Absorber

Easy adjustment of the force of pressure of the edge of the packaging to the heating plate. Prevents packaging from breaking. Eliminates micro-gaps and leaks.

Powerful Heater

Powerful heaters reduce heating time. It only takes 8-10 minutes (depending on the set temperature). Uniform temperature across the entire sealing surface. Thermal insulation reduces heat loss.

Cutting off the Film

with an automatically retractable cutter with 133 sharp teeth. Great choice for thick films. Film is cut just behind the sealed container in a special strip based on AIR-CUT technology

Includes a FREE 805572 die for single-compartment trays 227x178 mm!

Maintenance/Safe Zone

Frame base insulated from high temperature and electrical voltage. High quality materials and seamless design for quick cleaning of the bottom part of the body, without having to turn off the device.

Hot Point Temperature Controller

Temperature controller with a range of 50-210°C. For precise adjustment of bond strength for a wide range of packaging and sealing films.

Roller Truck Film Feeder with Tensioner

Versatile device for different roller widths – max. 187 mm. JUMBO rolls up to 170 mm in diameter. The tensioner ensures even positioning of the film, prevents unwinding and excessive feeding.

TRAY SEALER COMPACT

- Construction made of stainless steel.
- Equipped with a lid with spring mechanism for easy and safe opening.
- Insulated handle made of damage-resistant plastic.
- Automatic guillotine with safety knife in specially designed cover; cutting takes place just behind the sealed container in a special strip (air-cut technology).
- Anti-slip feet protecting the tabletop from scratching.
- Sealing surface has titanium coating that prevents film sticking and enables a fast seal in 1-3 seconds (depending on film thickness).
- Pressure absorber ensures a tight seal and prevents packages from crushing.
- Colour-coded LEDs for monitoring the performance.
- Overheat lock, overheat protection, illuminated safety switch.
- Warm-up time after start-up to full operational mode – approximately 8-10 minutes.
- Sealing of trays up to: 235x190x(H)155 mm and cups up to: (H)170 mm.
- Maximum film roll size: width 187 mm, ø170 mm – film sold separately (code: 970720).
- Equipped with aluminium die for 227x178 mm containers (code: 805572), without divider.

FILM FOR PET/CPP PEEL 12/40 SEALERS

- Designed for packaging PET 12 / CPP 40 food trays.
- PEEL layer for easy peeling off the sealed film.
- Film dimensions: width: 18.5 cm, length: 250 lm.
- Roll diameter: ø15 cm.
- Film roll weight: approx. 2.9 kg.
- Suitable for the HENDI tray sealer (330005).

VACUUM CHAMBER PACKAGING MACHINE KITCHEN LINE

- For professional use in the catering industry and other industries
- Durable design – high-quality stainless steel casing and chamber
- Transparent lid made of durable high-quality ABS plastic makes it possible to control the – packaging process
- Convex lid makes it possible to pack large portions
- Bag sealing time: 0-6 s
- 6 vacuum levels to choose from
- Sealing only function
- Marinating function: 11 cycles of extracting and letting air into the bag (one cycle takes 9 min); thanks to negative pressure, marinade penetrates into the product faster, which significantly speeds up the whole process
- The packing cycle starts automatically when the upper lid is closed
- Professional and highly efficient rotary pump
- Intended for continuous operation

975398

VACUUM CHAMBER PACKAGING MACHINE PROFI LINE

- For professional use in the catering industry and other industries
- For packing food and technical products, including those with a high water content
- Durable design – casing and chamber made of high-quality AISI 304 stainless steel
- Transparent lid made of durable high-quality ABS plastic makes it possible to control the packaging process
- Convex lid make it possible to pack large portions
- V-shaped gasket with a low leak rate
- Clear indicators (digital display and dial gauge) make it possible to pinpoint the moment when the required vacuum level is reached in the chamber of the packaging machine
- Adjustable pump operation time makes it possible to obtain an appropriate vacuum level in 0-99 s
- Adjustable sealing time within the range of 0-3.5 s
- Adjustable pump cooling level within the range of 0-9.9 s
- The packing cycle starts automatically when the upper lid is closed
- Oil pump ensures a short and very efficient packing cycle
- To be used with smooth and embossed bags

INDUCTION STOVE WITH 4 HOBS

- Designed for professional kitchens to prepare several dishes at the same time.
- Made of durable stainless steel, reinforced with frame.
- 2 separate induction cooktops, 320x560 mm each, made of 5 mm thick tempered glass.
- Equipped with 2 5000 W and 2 3500 W induction burners.
- Up to 60% energy savings when compared to standard electric cookers.
- 4 independent control knobs, 11 power levels to choose from.
- Safe and comfortable working thanks to heat generation only on contact between the hob and the pot or pan.
- Suitable for induction pots and pans with base diameter of ø160 - 260 mm.
- Maximum allowable load for cooktops: 100 kg.
- Adjustable feet (±30mm) for perfect leveling of the cooker.
- Rack provides ample storage space for pots, pans or other accessories.
- Unit is not supplied with a plug.
- Caution: the unit has to be connected to the power supply by an electrician.

DOUGHNUT DEEP FRYER

- The appliance is ideal for frying donuts, angel wings and various other dishes that are fried in deep fat.
- Designed for intensive use.
- Entirely Made of stainless steel.
- Large oil tank 400x400x(H)160 mm with a max. capacity of 12 liters.
- Welded oil tank with equipped with drain tap at the bottom.
- Removable control element with heater, with an additional safety feature that switches off the entire unit when removed.
- Temperature control: 50°-190°C.
- Overheating protection with reset function for better safety.
- "Cold zone" system separates frying residue below the heater level, increasing fat yield and preventing the fries from getting burnt.
- Rubber, non-slip feet.

IVIDE PLUS SOUS VIDE THERMAL CIRCULATOR

- High precision sous vide thermal circulator with temperature control.
- 4 inch Touch Screen interface.
- Designed to fit to any round or flat cooking vessel with a minimum depth of 16.5 cm by means of a clamp.
- Best performances up to 80 litres.
- Working temperature 5°C to 99°C, accuracy 0.07°C.
- Timer can be set between 1 minute and 99 hours.
- Multiple Machines can be managed from the app.
- Offers exceptional temperature stability.
- Low level water protection device switches off the sous vide in case of accidental use without water.
- Circulating pump to eliminate cold and hot spots.
- Temperature sensor to prevent overload and overheating.
- Carry Case as Standard.
- IPX7, can withstand splashes and accidental submersion.

App:

- Precise temperature control from anywhere.
- A collection of over 600 recipes.
- Our Sous Vide Calculator: We've done all the testing and research for you, which means no more scouring the internet for information.
- Recipe Memory: Store your own times and temperatures.
- Cook history: For greater HACCP control store your last cook 10 times and temperatures.
- Multi device cooking: Control Several cookers from one app.
- Notifications to confirm when the water is at temperature, and the food is cooked.
- Cook time complete, don't worry the app will keep the food at the optimum temperature for holding.

AROMATIC WOOD CHIPS

- Dust and wood chips were obtained from the wood of noble species of deciduous trees - fruit trees - and the wood of barrels of seasoned alcohols: red wine, whiskey and cognac.
- We recommend the latter to connoisseurs of the above liquors, as they give an extraordinary taste experience. The products come from fragments of old oak barrels in

- which the abovementioned alcohols were aged for years!
- In our offer, you will find delicate smoking dust and two types of wood chips - fine and slightly larger. Use them in the smoking process, and you will not only gain an excellent taste and smell of any dish, but you can also present it exceptionally attractive, causing the WOW effect!

Smoking dust

CONVECTION STEAM OVENS MANUAL NANO GN-SIZE

NANO

- A convection steam oven combines the efficiency of a convection oven with the capabilities of a steam oven.
- These modes can be used separately or in conjunction with one another.
- These ovens are the way to go when you want to create scrumptious baked goods, vegetables with a bite, flavourful roasted meat and poultry or perfectly steamed fish.
- Steam is generated by directly spraying water on the heaters.
- The steam levels in the chamber are controllable and the oven has multiple automated features to maintain the set levels.
- A direct water connection is needed: 3/4", max 30°C, 150-200 kPa (2 bar), only treated, softened water.
- Housing and chamber are made of high-quality stainless steel, the chamber is equipped with a drain in the bottom.
- The powerful 6 bladed fan(s) have auto-reverse and can spin at two speeds (1400/2800 rpm), this results in ideal distribution of air in chamber and preventing inner turbulence.
- The fan motor has double bearings and 250W of power.
- The manual control panel has thermostat and steaming indicator lights and three large knobs for setting the time, temperature and amount of steam.
- Timer can be set up to 120 minutes, temperature up to 260°C.
- The door is fitted with two layers of glass with space for gravity ventilation, this keeps the outside glass cool to the touch.
- Outside glass can be removed to ease cleaning.
- Door gasket is fitted in the chamber and removable to ease cleaning and replacement.
- The chamber is fitted removable GN-tray guides and halogen lighting.

- A convection steam oven combines the efficiency of a convection oven with the capabilities of a steam oven.
- These modes can be used separately or in conjunction with one another.
- These ovens are the way to go when you want to create scrumptious baked goods, vegetables with a bite, flavorful roasted meat and poultry or perfectly steamed fish.
- Steam is generated by directly spraying water on the heaters.
- The steam levels in the chamber are controllable and the oven has multiple automated features to maintain the set levels.
- Works with a direct water connection: 3/4", max 30°C, 150-200 kPa (2 bar), only treated, softened water.
- Housing and chamber are made of high-quality stainless steel, the chamber is equipped with a drain in the bottom.
- The powerful 6 bladed fan(s) have auto-reverse and can spin at two speeds (1400/2800 rpm), this results in ideal distribution of air in chamber and preventing inner turbulence.
- The fan motor has double bearings and 250W of power.
- The digital control panel has clear readouts for the different functions, time, temperature and cooking program.
- Electronic timer can be set up to 999 minutes, temperature up to 260°C.
- The oven is programmable to ensures the same level of quality in day to day operations.
- It's possible to create 99 3-step programs, 4 if pre-heating is also added to the program.
- The oven is fitted with a removable temperature probe which can work in conjunction with the incorporated Delta-T cooking function.
- Keeps the chamber warm before pre-heating to ensure quick ready times.
- The door is fitted with two layers of glass with space for gravity ventilation, this keeps the outside glass cool to the touch.
- Outside glass can be removed to ease cleaning.
- Door gasket is fitted in the chamber and removable to ease cleaning and replacement.
- The chamber is fitted removable GN-tray guides and halogen lighting.
- Automatic chamber heating before 'PRE-HEATING' cycle.

HOSE WITH RINSE HEAD FOR APPLIANCES

- Ideal for any chef to keep their appliances spotless.
- Suitable for cleaning any number of waterproof appliance parts and surfaces.
- A 2 meter long hose brings many objects into range.
- Ergonomic handle with valve lever is comfortable to hold.
- Supplied with a dedicated holder that can be placed on oven housing (as indicated by technician) or on the wall using 3 screws.
- Jet is divided into a number of smaller ones using a strainer which increases the cleaning area covered.
- Water temperatures from 5°C to 85°C are ideal.
- Maximum water flow rate up to 11 L/m at pressure of 3 bar.
- Recommended supply water pressure: 3 bar.
- Operating pressure of supply water: 0.5 to 7 bar.
- PA66 nylon housing, metal parts made of chrome-plated steel.
- Water supply connection: 1/2" inner diameter.

OVEN MITTS

- HENDI protective gloves are certified personal protective equipment and comply with the requirements of REGULATION (EU) 2016/425 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 9 March 2016 on personal protective equipment and repealing Council Directive 89/686/EEC. The regulation defines hazard categories I through III, and for each category, methods, and certification requirements are specified. HENDI protective gloves are a category II protective equipment.
- They are CE marked as certified personal protective equipment.
- All our gloves meet the requirements of the general standard EN 420

1432X

Protection against mechanical hazards.

Gloves that protect against mechanical hazards are marked with a pictogram and numbers describing the degree of protection provided, e.g:

- The first digit indicates the abrasion resistance, the second the disc cut resistance, the third the tear resistance, and the fourth the puncture resistance.
- An additional letter at the end (from A to F) indicates the degree of cut protection depending on the force applied (from 2 N to 30 N).

11XXXX

Protection against thermal hazards

Gloves that protect against thermal hazards are marked with a pictogram and numbers describing the degree of protection provided, e.g:

- The first digit indicates the burning behaviour, the second resistance to contact heat, the third resistance to convection heat, and the fourth resistance to radiation heat, the fifth resistance to small splashes of molten metal, the sixth resistance to large splash of molten metal.

20 mm outer rim around all four sides
– allows placing the tray in point of sale displays – promotion and sale of products “directly from the tray”

Non-stick coating
– de marmereffectcoating voorkomt aanbakken; bak met 90% minder vet/olie

The robust structure
prevents undesirable deformation. The tray is positioned securely in the oven chamber's guides and is deformation-resistant

Bottom and outer walls with increased thickness of 1 mm
guarantee temperature stability on the entire surface, without uneven heat distribution

Made of odourless enamelled steel – no odour emissions
at high temperature ranges. Heat resistance up to 300°C

Safe coating
– no toxins are released when baking foodstuffs in high temperatures

The tray has right angles
allowing for maximum use of the finished product and easier food cost estimation, which translates into profit enabling exact portion sizes and higher return on investment

PIZZA OVENS COMPACT

- Ideal for baking pizzas, bread, lasagnas, etc.
- The compact dimensions make it perfect for small kitchens or even food trucks.
- The use of high-quality materials guarantees a long service life.
- Housing made of high-quality stainless steel AISI 430, easy to clean and maintain.
- Oven chamber measures 415x400x(H)120 mm for pizzas or other dishes.
- Chamber floor lined with chamotte stone; these accumulate the heat which results in crispy pizza bottoms.
- Each heating element is 1000 W and can be set independently from 50°C to 350°C.
- The door is fitted with a window and the chamber has a light, this allows to follow the cooking process.
- The door can be opened without stopping the heating process.
- Can operate in continuous mode or with a timer.
- Timer can be set up to 120 minutes and when the time is finished the oven stops heating.
- Fitted with ± 1.7 m long power cable with earthed plug.

CHEESE-GRATING MACHINE

- Capacity of 30 kilos per hour.
- Functional and practical, stable body.
- Despite its small size, the device offers high performance.
- Ideal for grating Parmesan cheese and other hard cheeses.
- Motor is protected against overloading.
- Provided with grated cheese container 1,3 L.
- Speed: 1400 RPM.
- Cylinder diameter Ø 110x60 mm.
- Weight 8 kg.

SPIRAL MIXERS

- For professional use.
- Ideal for pizzerias, bakeries, patisseries, dumplings bars, doughnut shops to mix heavy dough.
- Sturdy and robust housing made of white lacquered steel.
- The bowl, protection grid and spiral are made of AISI 304 stainless steel.
- Safety guard with a grid makes it easy to add ingredients during operation.
- With microswitch, operation stops when safety guard is lifted.
- Chain drive ensures efficient operation.
- Quiet work guaranteed thanks to oil bath gearmotor.
- The spiral design ensures perfect homogeneity and aeration of the dough.
- The mixer doesn't heat up the dough during operation.
- With built-in 30 minute timer.
- Fitted with 4 wheels of which 2 have brakes ensuring comfortable transport and easy use in the kitchen.
- 2 options to choose from: with fixed head and bowl or with rising head and removable bowl.

PIZZA DOUGH BOX

- Made of food-grade polypropylene, harmless to human health.
- It maintains freshness of dough and continuity of proofing process.
- Stackable – with or without lids.
- Dishwasher safe.

AMER★BOX

WHAT SHOULD AN IDEAL PIZZA DOUGH PROOFING BOX BE?

Airtight

One of the most key features to look out for is whether your dough proofing box is airtight. This prevents the dough from drying out during prolonged fermentation and makes the dough easier to form.

Environmentally friendly

The use of airtight, resealable boxes reduces the use of foil, traditionally used to cover the dough during proofing. Plastic boxes are durable and can last for many years.

Made of suitable material

Traditional Italian dough proofing boxes were made of wood, but modern plastic boxes provide several benefits. They are airtight and they improve the shape and structure of the dough balls. The right amount of time for the dough to proof creates the right structure which translates into comfortable work – the dough is easier and quicker to stretch. This is not possible with metal containers that interfere with the dough proofing process.

The plastic surface is also smooth, which prevents the dough balls from sticking and makes it easy to remove them from the box after proofing.

Stackable

During proofing and fermentation, we keep multiple balls of dough at the same time. Stackable boxes take up less space in the kitchen. Stacked boxes are also easier to handle due to their stability.

No rounded edges

Special pizza dough boxes make it easy to cut and pull the dough without misshaping it. GN containers, which are used in kitchens, have rounded edges, thus making it impossible to remove the dough balls without destroying their shape.

WATERPROOF COATING

The bag is made of a high-quality material that protects its contents against water and wind.
EASY DELIVERY EVEN WHEN IT RAINS OR SNOWS

HENDI

aluminium

polyethylene

polypropylene

UNIQUELY CAPACIOUS INTERIOR

The bag has a capacity of 72 litres, which means that you can deliver up to:
10 pizza boxes* or 8 salads* + 6 main courses* + 6 soups*
HIGH CAPACITY = HIGH PERFORMANCE =
LOWER COST OF DELIVERY = HIGHER PROFIT
* standard delivery packaging was used for the measurement.

ADJUSTABLE THERMAL SHELF

A shelf that divides the compartment into two parts.
Select a place for salads, coleslaws.
Put hot dishes in a separate compartment.
COOL AT THE BOTTOM, HOT AT THE TOP

SEPARATORS

The thermal bag has 5 semicircular separators in the lower shell.
They provide thermal insulation of the container compartment from the ground and prevent the outer fabric from becoming worn out.
DON'T WORRY ABOUT PUTTING IT DOWN THE DISHES ARE SAFE

MULTIFUNCTIONAL CARRIER

Equipped with:

- Chest + belt tensioners
 - Hooks for payment terminals/on the straps
 - Comfort system – soft, ventilated cladding with light foam on the back and the harness
 - Waterproof bill pocket
- FUNCTIONALITY COMFORT
"HANDS-FREE"

THREE-LAYER WALL WITH COMPARTMENT INSERT

Low temperature permeability thanks to the multi-layer system of walls where the PVC compartment insert plays an important role.
It stiffens the entire structure and provides effective thermal insulation.
THE THERMO INSTANT TECHNOLOGY KEEPS THE FOOD WARM FOR MORE THAN 1.5 HOURS

STRUCTURAL AND SUPPORT BELTS IN AUTOMOTIVE TECHNOLOGY

Polypropylene weave strips in the belt.
Durable, strong, with a great design that will last for years.
NO FRAYING OR UNRAVELLING

PIZZA & FOOD DELIVERY BACKPACK INSULATED

- Lightweight backpack with large, adjustable, padded shoulder straps and padded back section for comfort.
- Fitted with adjustable waist band for extra stability.
- Waterproof thanks to the use of durable 600D polyester.
- Large compartment with adjustable, velcro mounted shelf.
- Compartment has two layers of insulation, PE foam and aluminium foil.

- One side of the backpack can be opened with a zipper for easy access.
- With large padded carrying handles on the top and a transparent card holder on the back.
- Reflector strip fitted on the outside for extra safety.

NEW**DRY AGING CABINET**

- Body, door frame, and door handle made of AISI 304 stainless steel.
- Door made of 2 layers of Low-E tinted tempered glass which increases energy efficiency by blocking infrared light and UV from the outside while preventing the heat from transferring inside. Door lock is included.
- Distilled water container made of ABS – distilled water must be filled manually.
- Notification on display and audible alarm to warn when humidity is below 15% for the user to fill the water container.
- Alarm indicating the door open for more than 3.5 minutes – protection against uncontrolled disruption of the conditions in the chamber.
- In the cabinet there are:
 - 3 shelves,
 - 1 hanging rod,
 - 3 hooks,
 - salt tray (salt not included),
- all elements above are made of AISI 304 stainless steel.
- Built-in UVC sterilisation lamp to prevent bacterial growth and guarantee safe environment for the meat; when the door is opened during the seasoning process, bacteria do not have a chance to develop.
- Cooling by means of an evaporator and a ventilator which ensures the required level of air circulation.
- LED lights placed on both sides of the chamber and on the ceiling.
- Max. load per shelf: 30 kg.
- Max. load per hook: 25 kg.
- Max. load of the hanging rod: 50 kg.
- Temperature range: 1-25 °C.
- Adjustable humidity range: 60-85%.
- Current humidity level is displayed on the panel.
- Refrigerant: R600a.

204962

Blast chilling from +90°C to +3°C

This process helps lower the food temperature to safe +3°C in a suitably short time, in line with HACCP standards.

The adequate chilling speed helps reduce bacteria growth in the range from +65°C to +10°C.

Blast chilling helps retain the quality, colour and smells of food and extends the storage period.

Blast freezing from +90°C to -18°C

Powerful chilling system and blowing air of -40°C into the chamber makes the core temperature of food quickly drop to -18°C.

It prevents large ice crystals from occurring, which damage the internal structure of food.

Blast freezing results in a large number of small crystals which preserves the original properties of food: flavour, colour, texture and nutrients, and helps extend the storage period.

Arktic ❄️
ESTABLISHED SINCE 1952

BLAST CHILLER 3X GN 2/3

- For quick cooling or freezing of prepared food, freezing cakes, desserts, fish or ice cream.
- Stainless steel exterior and chamber interior, galvanized steel base.
- Chamber with rounded internal corners for easy cleaning.
- 3 stainless steel guides suitable for GN 2/3.
- 60 mm polyurethane insulation, injected under high pressure.
- Self-sealing door with left hand hinges and magnetic seal.
- Front panel with electronic control and display.
- Easy access to capacitor for cleaning and maintenance.
- Manual defrosting with door open.

- Removable drip tray.
- Distance between guides: 80 mm.
- Cooling capacity at 9kg: (+65°C/+3°C) in max. 90 min.
- Freezing capacity at 7kg: (+65°C/-18°C) in 240 min.
- Cooling Agent: R455.
- Fan forced cooling.
- Chamber and Core Probe Included.
- Adjustable feet (up to 20 mm).

BLAST CHILLERS

- Enables quick chilling or freezing of prepared dishes.
- Chilling from 70°C to 3°C (90 mins), from 70° C to -18°C (240 mins) or within a pre-set time (without indicating the target temperature).
- Outer housing and inner chamber made of high-quality stainless steel.
- Inner chamber with rounded corners for easier cleaning.
- Forced air cooling with auto-defrost, compressor placed underneath the chamber.
- 60 mm thick polyurethane foam insulation.

- Removable top cover.
- Self-closing door with magnetic gasket.
- Digital temperature controller and display.
- Probe included.
- Fitted with 4 adjustable stainless steel feet.
- Climate class: SN-T
- Coolant: R455.

THERMO CATERING CONTAINER 2X GN 1/1 200

- Double-walled insulated polyethylene LDPE - impact resistant hard polyethylene.
- Keeps hot and cold.
- With 2 sturdy carrying handles.
- Press-formed guides fitted in chamber housing.
- Inside dimensions: 335x533x(H)590 mm.
- Suitable for 1/1 Gastronorm trays:
 - 12 GN trays - 10 mm deep.
 - 6 GN trays - 65 mm deep.
 - 4 GN trays - 100 mm deep.
 - 3 GN trays - 150 mm deep.
 - 2 GN trays - 200 mm deep.

- Embossed area - drop towards the trap, envelope-shaped.
- Drain compatible with standard traps: $\varnothing 50$ mm.
- 40 mm backsplash to prevent water from flowing out.
- Framework and body made of standard AISI 430, dimensions 40x40 mm.
- Basin table front cover - made of AISI 430 steel.
- Welded for high durability and stability.
- Adjustable feet: +25/-5 mm.
- Tap opening: $\varnothing 30$ mm.

WALL MOUNTED CABINET WITH SLIDING DOORS - WELDED

- Made of durable stainless steel (AISI 430).
- Equipped with sliding doors with plastic handle, all on roller bearings.
- The smooth internal surface eases cleaning.
- Maximum spread load capacity per shelf: 70 kg/m².
- Welded for high durability and stability.
- Delivered with special strip brackets for mounting on the wall.

TABLE WITH 1 SINK BOWL AND A SHELF – SCREWED, DEPTH: 600 MM

- Durable construction made entirely of AISI 430 stainless steel.
- Sink with the dimensions of 400x400x(H)250 mm.
- Sink bowl pressed from a single sheet of steel, seamlessly welded into the worktop.
- Drain compatible with standard traps: Ø50 mm.
- A special opening for installing a Ø30 mm tap.
- A 40 mm backsplash on one side of the table protects the walls from stains.
- Non-adjustable shelf, distance from the floor to the bottom edge of the shelf: 160 mm.
- Legs made of 40x40 mm profiles.
- Screwed structure allows for folding, storage and transport of the piece of equipment.
- Piece of equipment designed for work performed in the kitchen.
- Approximate maximum load per worktop: 70 kg/m².
- Adjustable feet: +25/-5 mm.

code	mm	sink location	€

SINK TABLE - WELDED, 2 SINKS

- Sink bowls pressed from a single sheet of stainless steel characterised by high resistance to food acids and chemicals
- Sink bowl seamlessly welded into the worktop
- Sink dimensions: 400x400x(H)250 mm
- Drain compatible with standard traps: Ø50 mm
- Tap opening Ø30 mm
- Worktop with 10 mm recess to prevent water from flowing out
- Welded
- Feet made of 40x40 mm profiles
- 40 mm backsplash prevents the walls from being stained
- Feet legs moved from the wall by 50 mm to ensure easy wall-mounting
- Adjustable feet – 25 mm upwards or 5 mm downwards
- Approximate maximum load per worktop – 70 kg/m².
- 400x400x(H)250 mm sink.

TABLE WITH SINK, DISHWASHER SPACE AND SHELF

- Made of high-quality stainless steel.
- Smooth and polished surfaces and joints for safe and easy cleaning.
- Reinforced worktop (AISI 430).
- Worktop with marine edge fitted with a 40 mm backsplash, prevents the buildup of dirt between the table and the wall.
- The integrated sink (AISI 304) measures 400x400x(H)250 mm.
- Comes with a pre-drilled tap hole of \varnothing 30 mm.
- The reinforced shelf measures 575x585 mm and is non-adjustable.
- The legs (AISI 430) are made of 40x40 mm tubes and fitted with adjustable feet (+25 / -5 mm).
- Available with a sink on the left side (237519) or on the right side (237526).
- Spread load capacity: ± 70 kg/m².
- Bolted construction for self-assembly.
- Flatpack delivery.

DISHWASHER 50X50 – ELECTRONIC CONTROL

- Extremely easy to use, clean and service
- Ideal for washing plates, cutlery, glassware, cups, trays
- Electronic control, touch control, electronic panel
- Detergent and rinse aid dispensers and pump as standard
- AISI 304 stainless steel housing
- Bottom rotating, separate plastic washing and stainless steel rinsing arms
- At the top stationary plastic wash arms, rotating stainless steel rinse arms
- Robust double-skinned door with microswitch for operation at opening
- Maximum height of glass to be cleaned: 325 mm
- Maximum height of plates to be washed: 335 mm
- Washing water temperature 60°C
- Flushing water temperature 85°C
- Boiler (capacity/power): 6 l / 6 kW
- Bath (capacity/power): 35 l / 2.8 kW
- Washing pump: 0,75 kW
- Safety thermostat for boiler/bath: up to 105°C / 99°C
- Electronic boiler and bath water thermometer
- Sealing factor of the pump: IP 44
- Vertically adjustable feet ±10 mm, Ø40 mm
- Weight: 55 kg

FUNCTIONS:

- Three washing programs: 60, 120, 180 s. (The washing program can be automatically extended by the time of warming up the rinsing water to +85°C)
- Dishwasher compartment washing programme
- Can be rinsed with cold water - especially suitable for glass washing
- THERMO-PROTECTOR™ system to prevent cold flushing water - guarantees the start of rinsing at temp. 85°
- SOFT START™ system starts the water pump at a lower level pressure
- and a gradual increase in pressure to protect delicate vessels
- 8-point self-diagnostic system
- ECO system - for reduced power consumption

EQUIPMENT:

- 1 universal glass basket 500×500×(H)105 mm
- 1 basket with pins for deep and shallow plates with 5×8 pcs, 500×500×(H)105 mm
- 1 cutlery basket 110×110×(H)130 mm
- Electric detergent and rinse aid dispenser
- Water hose 1.5 m long, with ¾" female thread connection
- Drain pump
- Drain hose
- Electric cable without plug

²⁾ "SOFT START" – activates the water pump at a lower pressure and gradually raises the pressure to avoid damaging delicate dishes

³⁾ "THERMO-PROTECTOR" system – prevents rinsing with cold water – guarantees that rinsing will start at 85°C

⁴⁾ Self-diagnosis system for a quick check of the dishwasher condition

HOOD DISHWASHER - ELECTRONIC CONTROLLER

- Extremely easy to use, clean and service
- Ideal for washing plates, cutlery, glassware, cups, trays, GN 1/1 containers
- Electronic control
- Detergent and rinse aid dispensers and drain pump as standard
- Maximum height of washed plates 400 mm
- Maximum height of glass to be cleaned 395 mm
- Touch electronic control panel
- AISI 304 stainless steel housing
- Stainless steel upper and lower washing and rinsing arms
- Lifting of the hood facilitated by built-in springs
- Washing water temperature 60°C
- Temperature of rinsing, scalding water 85°C
- Boiler capacity and output 13.5 l / 7.5 kW
- Tank capacity and power 68 l / 6.0 kW
- Cleaning pump power 1,5 kW
- Electronic water thermometers for the boiler and bath separately
- Safety thermostat for boiler/bath up to 105°C / 99°C
- Sealing factor of the pump: IP 44
- Corner installation of dishwasher possible
- Water connection: ¾"
- Weight: 131.5 kg
- Adjustable stainless steel feet from 100 to 150 mm

FUNCTIONS:

- Three washing programs: 60, 120, 240 s
- Dishwasher compartment washing programme
- Possibility of a final rinse with cold water - especially useful when washing glass
- „THERMO-PROTECTOR“ system to prevent rinsing with cold water
- 8-point self-diagnostic system
- „SOFT START“ function to start the water pump at a lower pressure and raise it gradually so as not to damage delicate dishes
- Door with microswitch for operation when hood is raised
- ECO function - reduces power consumption when the device is not used for more than 15 minutes

EQUIPMENT:

- 1 universal glass basket 500x500x(H)105 mm
- 1 basket with pins for deep and shallow plates with 5x8 pcs, 500x500x(H)105 mm
- 1 cutlery basket 110x110x(H)130 mm

WATER SOFTENERS (SEMI-)AUTOMATIC

- Using water softeners helps extend the life cycle of catering equipment.
- The softeners are based on an ion-exchange process wherein the calcium and magnesium ions that cause water hardness are captured by ion exchange resin inside the softener.
- It helps reduce maintenance costs thanks to effective prevention of lime scale deposits. The device is fitted with a control head that makes it possible to configure working parameters of the water softening system as required.
- The elements inside the head are made of high quality ceramics, resistant to abrasion, corrosion and build-up of impurities (e.g. iron).
- This technology assures perfect seal inside the controller and

- therefore long and trouble-free operation.
- Navy blue housing.
- Water connection diameter 3/4".
- Working pressure: 1.5-6.0 bar.
- Working ambient temperature: 5 – 38°C.
- Max. supply water temperature: 38°C.
- Regeneration time: 37 min.
- Output for 10°dH – 1200 L.
- Resin bed 4,0 L.
- Regeneration tank: 8 kg.
- Maximum water flow: 5 L/min.
- Regeneration salt consumption per 1 cycle: 0.5 kg.

230442

230459

WATER SOFTENER, SEMI-AUTOMATIC

- The semi-automatic resin bed regeneration process using brine is initiated manually.
- Weight: 8 kg.

SALT TABLETS FOR WATER SOFTENING

- Ingredients: sodium chloride NaCl.
- Bag 25 kg.

code	weight (kg)	€
231265	25	19,50

231265

WATER SOFTENERS MANUAL

- Hard water contains dissolved minerals - calcium and magnesium compounds, among others. Calcium and magnesium ions cause scale build-up, which is risky for objects and tools in contact with water or steam.
- Water softening is a process in which all calcium and magnesium compounds causing water hardness are removed.
- When passing through the resin column, calcium and magnesium ions are absorbed by resin particles.
- When ion-exchange ability of the resin wears off, it ought to be restored in an appropriate regeneration process with the use of a salt solution.

- Water softener may be installed wherever water temperature is below 45°C and the water input pressure does not exceed 2 bars
- Regeneration: uniodised salt only.
- For drinking water only.
- Suitable for softening water for coffee makers, combi steamers, dishwashers and ice cubers.
- Thanks to its small size it is perfect for bars and restaurants.
- Thanks to highest quality components used, the device remains fail-safe and operational for many years.
- Optimum working water pressure: 1-2 bar.

WATER SOFTENER

- During softener regeneration the connected machine must not be used.
- Maximum/minimum water pressure: from 1 to 8 bar.
- Nominal flow: 1000 L/h.
- Ambient temperature: from 4 °C to 35 °C.
- Supply water temperature: from 4 °C to 25 °C.
- Connection size: 3/8".

UNIQ CHAFING DISH

- Stylish and functional design by Dutch designer Robert Bronwasser.
- Body made from high temperature resistant polypropylene.
- Removable GN1/1 container (H)100 mm made of AISI 304 stainless steel, easy to clean.
- Heating element made from AISI 304 stainless steel and placed in the water container for efficient heat transfer.
- Tempered glass lid fitted with insulated handle, ladle notch and aluminium hinge.
- The design of the two-part lid reduces the heat loss by opening, while maintaining optimal hygienic conditions.
- Integrated card holder on the lid for product name cards.
- Sloping edge design of the lid that guides condensation water back into the container.
- The sensitive water sensor module reminds users when it's time to refill the water container and thus prevents dry boiling.
- Digital control panel with display to show working time, set temperature and actual temperature.
- The last temperature setting is saved in memory and will be selected every time the power is turned on.
- Temperature can be set from 35 up to 85°C in 1° increments.
- Water container is embossed with a max. fill line, indicating ± 4 L.
- Not intended for cooking, only for keeping warm.

CHAFING DISH FUEL

- Chafing dish fuel is made from natural ethanol alcohol, mixed with water and a thickening agent to make it a solid or gel.
- HENDI chafing dish fuel is artificially made to taste so bitter that it is impossible to swallow.
- To safely and efficiently warm chafing dishes, we urgently advise to place the chafing dish fuel can in the indicated fuel holders.
- The heating capacity is equal throughout the range while the heating rate depends on the size of the flame, determined by the distance the lid of the chafing dish fuel can holder is kept open.
- All HENDI chafing dish fuel burn soot and odourless.
- Cartouches and cans burning without the chafing dish fuel can holder become very hot during use, creating a significant risk of burns if they are not placed inside the chafing dish fuel can holder. Danger of burns!
- These chafing dish fuel can holders are included with the HENDI chafing dishes and available separately.
- Always read the product instructions before use.
- Make sure there are no open flames or hot objects nearby when working with chafing dish fuel.
- The flammable vapour easily escapes from the container.
- Make sure that no water (condensation) drips into the burning fuel. It can cause dangerous sputtering and splashing of fuel.
- Only light the fuel after placing the chafing dish fuel can holder with can in the final location.
- The flames are almost entirely blue, making them very hard to see in the light. Caution is advised.
- Only ever extinguish the fuel by closing the lid of the chafing dish fuel can holder.
- Refilling: Always make sure the can and its holder have completely cooled down.
- Remove the can from the chafing dish fuel can holder to refill the can.
- Storage: Always store it in closed containers in a dark and well-ventilated location, below 20°C.
- To store larger amounts of fuel, please consult your local regulations.
- If the above instructions are followed, the risk of accidents will be minimal.
- In case of a starting/small fire: use a fire blanket (or a large, wet blanket) to cover the fire and deprive it of oxygen.
- In case of fire on clothes/body: use a fire blanket or a powder/CO₂ fire extinguisher.
- Never try to extinguish the fire with a small towel as this would only spread the fuel and the flames! After extinguishing the fire keep the body cool for 15 minutes or until medical assistance arrives.
- Leave clothes in place.
- Always seek medical assistance immediately.

Benefits:

- + Doesn't contain toxic methanol
- + Safe to use indoors
- + No toxic fumes or bad odours

GAS BARBECUE 'EUROPA'

- The Europa 3 has excellent cooking properties. The high temperature sears meat evenly and quickly, reducing adhesion to the grid even when the grid hasn't been greased.
- The three, separately adjustable, lengthwise burners have thermocouple security and electronic ignition.
- The Europa 3 has a completely black epoxy coated frame with four wheels, two of which are caster wheels, and a secure gas bottle holder.
- Grease which is drained from meat during cooking is led through a special channel to a grease collector.
- Thanks to the deep gas bottle holder you can place the gas bottle safely under the barbecue.
- The Europa 3 is supplied complete with lava rocks and a roasting pan.
- Griddle surface: 1100 x 500 mm.

code	kW(HS)	mm	€

GAS BARBECUE ATLANTA

- The Atlanta has excellent cooking properties due to the optimal heat distribution and hot air circulation inside the burner enclosure. The high temperature sears meat evenly and quickly, reducing adhesion to the grid even when the grid hasn't been greased.
- The 3 separately adjustable transverse burners have thermocouple security and electronic ignition.
- The burner assembly is made entirely of stainless steel and the grids are removable for easy cleaning.
- The three burners also allow the surface to be divided in separate heat zones for simultaneous cooking of meat, vegetables & fish.
- The Atlanta has a completely black epoxy coated frame with four caster wheels and a secure gas bottle holder.
- Thanks to the deep gas bottle holder you can place the gas bottle safely under the barbecue.
- Griddle surface: 1100 x 500 mm.

CHARCOAL MARABU

- For barbecuing meat, fish, seafood, vegetables and appetizers.
- Produced by carbonisation of hardwood at temperatures between 400 and 700°C, without air.
- Made from the invasive marabou plant that grows in Cuba – perfect raw material for environmentally and socially responsible production.
- 100% natural.
- Releases a smoky aroma during burning which gives food a unique flavour.
- High calorie content, low spark level.
- Twice the burning time compared to commonly used soft charcoal types.

LOUNGE HEATER

- Suitable for propane or butane gas, max. 15 liter gas bottles.
- Compact design with hinged door for easily replacing the gas bottle.
- With tilt switch, flame failure device and flame guard for enhanced safety.
- Including electronic ignition, gas hose and pressure regulator.
- Easy to transport thanks to the 2 wheels.
- Weight: 14 kg.

BOLA PATIO INFRARED RADIANT HEATER

- Suitable for heating and warming up patios on cold days.
- Powerful – will keep your guests comfortable even when the temperature is low.
- Designed for wall mounting, it can heat an area from about 16 to 32 m².
- The heating lamp uses modern carbon fiber, which translates into longer life and high heating efficiency with low energy consumption.
- Robust housing with protective grid made of heat-resistant aluminium.
- Supplied with remote control for easy adjustment of settings.
- You can choose between 4 heating power levels.
- With built-in timer for up to 25 hours.

TORNADO INFRARED RADIANT HEATER

- Suitable for heating and warming up both indoor and outdoor areas.
- Powerful – will keep your guests comfortable even when the temperature is low.
- Free-standing, with a stable base, it can heat an area from about 16 to 32 m².
- The heating lamp uses modern carbon fiber, which translates into longer life and high heating efficiency with low energy consumption.
- Robust housing with protective grid made of heat-resistant aluminium.
- Supplied with remote control for easy adjustment of settings.
- LED display indicating the current heating level.
- You can choose between 2 heating power levels.
- With built-in timer for up to 25 hours.

	Energy saving product		Food Contact compliant		High density polyethylene
	HACCP compliant		Not Food Contact compliant		Low density polyethylene
NEW	New product		Cooling		Polypropylene
	For indoor and outdoor use		Self-assembly		Expanded Polypropylene
	For indoor use only		Temperature resistance		Polycarbonate
	For outdoor use only		Temperature resistance range		ABS plastic
	Suitable for gas stoves		Aluminium		POM plastic
	Suitable for gas stoves only		Aluminium casting		Polyamide
	Suitable for electric stoves		Stainless steel		SAN plastic
	Suitable for ceramic stoves		Stainless steel 18/0		Hard polymer heat resistant
	Suitable for induction stoves		Stainless steel 18/8		Silicone
	Not suitable for induction stoves		Stainless steel 18/10		Plexiglas
	Microwave proof		German steel X50CrMoV15		BPA free – no Bisphenol A
	Not microwave proof		Carbon steel		Fiberglass
	Dishwasher proof		Tin plated		Melamine
	Not dishwasher proof		Chrome plated		Porcelain
	Suitable for use in ovens		Nickel plated		Non slip
	Stackable		Polyethylene		Magnetic
